To Whom It May Concern,

YMI has completed multiple projects and service related calls at Adventist Bolingbrook Hospital which include the follow:

- #1 MRI Chiller - Replaced PVC pipe with copper - Initial contractor did not have knowledge of proper materials needed and tried to reduce costs by using incompatible material with propylene. By history, YMI has been servicing this unit, and other refrigeration units at Adventist Bolingbrook Hospital, and other campus buildings, i.e. morgue walk-in cooler, Pharmacy freezer, etc...
- #2 Designed and replaced undersized duct work for multiple VAV boxes to reduce velocity noise.
- #3 Installed the HVAC system for a new suite in the Medical Office Building following provided engineering specifications.

All projects have been completed in a professional and timely manner. The staff and management of YMI are very diligent in follow-through with all aspects of assigned projects, displaying good communication and caring attitude.

We look forward to future projects and services delivered by YMI at Adventist Bolingbrook Hospital for our equipment needs.

Sincerely,
